Education

Edge Hill University

September 2017- June 2020

BSc (Hons) Web Design & Development

During my degree I have had the opportunity to collaborate with fellow students in order to achieve solutions to project briefs. An example would be the creation of a web app that would allow Edge Hill students to track the movements and give an ETA of the campus golf buggy that ferries students to and from the university car park. Currently working on my final project entered around the development of a Progressive Web App to solve network uncertainty issues.

Modules have included; Server and Client Side Scripting, Usability Testing and Data Analysis, Web Application Development, and Mobile Applications Development.

Wigan and Leigh College

September 2014- June 2016

BTEC - Level 3 Extended Diploma in Graphic Design

In my time at college I had chances to work with external clients to meet given project briefs. As a result, my work has been used in company branding and on storefronts. I received a final grade of D*D*D* after completion of the course which allowed me to apply to my desired university.

Modules included; Communication Through Design, Design for Advertising, Computers in Art & Design, and Typefaces and Letter-forms.

Rose Bridge High School

Graduated June 2014

GCSEs

Art & Design: B IT: B Graphic Design: B English (Language/Literature): C Maths: C Applied Sciences: C

Voluntary Work

RAF Woodvale

October 2017 - December 2017

Web Developer

Lead the design and development of a local RAF station's new website that now acts as a hub for current and future members.

Wigan Youth Zone

May 2016 - August 2016

Disability Inclusion Volunteer

Working with the Disability Inclusion Team to help children with disabilities enjoy the Youth Zone’s facilities through fun & inclusive sports/activities.

Illustrate Digital (Love Wigan branch)

September 2013 - March 2014

Web/Graphic Designer

Part of a small team of creatives learning from business professionals in the start-up phase of the company. Illustrate Digital has now grown and works with household name brands.

Work History

Primark

August 2016 - July 2017

Retail Assistant

Versatile role requiring work in different areas of the store; the shop floor, stock room, taking deliveries and working the baler.

Projects

Quaker

<http://quaker-app.herokuapp.com/>

Quaker is a primary research tool developed for my Server and Client Side module. It follows the UX found in applications like Google Forms, which allow the creation of questionnaires with minimal pop-up menus and disruptions to the user.

Stack: Laravel MVC

Campus Chat

<https://github.com/craigmhughes/campus-backend/>

<https://github.com/craigmhughes/campus-frontend/>

Campus Chat is a single-page messenger app (SPA) tailored to university students requiring mentorship in a subject. Users can mark themselves as open to being mentored or to mentor others. Connected users are added to the “My Study Group” page and are then allowed to send messages.

Stack: Laravel API and React

Skills

List of skills paired with where they have been gained.

Git (Version Control) - Projects on Github via git
JavaScript - University work
React - CampusChat Project
SQL/MySQL - Quaker Project
Wordpress - RAF Woodvale
SCSS/Sass - CampusChat Project

Adobe Creative Suite Apps (Photoshop, Illustrator, XD, InDesign) - College work and time at Illustrate Digital.
Laravel (API & MVC) - University and Personal Projects.
Teamwork - Collaborative projects at University.
